

Enhancing health care to impact generations...

Lloydminster Region Health Foundation

Current Priority Project:

Heart Health Initiative

Home is where healthy hearts are- and your generosity will help ensure that the best and most timely care is offered right here in our community.

The *Heart Health Initiative* focuses on several key areas:

1. **The Prevention and Management of Heart Disease**- Your gifts will work to help support prevention programs and education programs right here in our community, as well as rehabilitation programs for those who have had a heart attack or stroke.
2. **High-tech equipment for Lloydminster Hospital**- Through the support of our generous community, over \$260,000 has been raised for high-tech equipment thus far. These funds will be used to purchase brand new diagnostic equipment for Lloydminster Hospital. This equipment will perform carotid scans and heart echoes on patients who have suffered, or may suffer a heart attack or stroke. Additional funds raised will help purchase high-tech equipment, which will provide our trained professionals with the tools they need to treat heart attack and stroke patients in a timely and effective manner. This saves travel to larger centers, and allows patients to be close to their family and friends during their time of need.

Your donation will help:

- Ensure state-of-the-art technology is right here in our Hospital
- Purchase new high tech equipment
- Ensure the best care is available right here in our community
- Reduce the need for travel to larger centers

Total Project Goal: \$450,000

Funds Raised To Date: \$268,584

Remaining to be funded: \$181,416

With your help, amazing things can happen.
