

For Immediate Release:

Mammography fundraising efforts boosted by ATCO Electric

Lloydminster, Alberta (June 24, 2009) — The Lloydminster Region Health Foundation’s mammography program inched closer to its fundraising goal, thanks to a \$5,000 donation from ATCO Electric towards a new digital mammography machine.

“ATCO Electric is pleased to support the Lloydminster Region Health Foundation’s mammography program,” said ATCO Electric President, Sett Policicchio. “This program will ensure local access to leading-edge mammogram technology and treatment for women in Lloydminster and surrounding communities.”

“We are grateful for ATCO Electric’s donation toward the mammography program,” said Penny Manners, Lloydminster Region Health Foundation. “ATCO Electric’s support for the acquisition of preventative and often life-saving equipment in our health facilities will make a huge difference to our community.”

Digital mammography is a leading diagnostic imaging tool used to detect breast cancer. The equipment provides digitally-enhanced images with outstanding clarity and contrast, leading to a quicker diagnosis of the disease.

The mammography program provides breast screening for Lloydminster-area residents, which reduces the inconvenience for patients, including those at high risk, of having to travel to Edmonton or Saskatoon for diagnoses and treatment.

ATCO Electric provides safe, reliable delivery of electricity to more than 202,000 customers in 245 communities across Alberta and is part of the ATCO Group of Companies. ATCO Group is an Alberta-based, worldwide organization of companies with more than 7,700 employees actively engaged in Power Generation, Utilities, and Global Enterprises. More information about ATCO can be found on its website www.atco.com.
